

- 1.Created class Student with name,phone,roll, std as data members.
- 2.In input method all the data members are getting initialized and is acting as setter method.
- 3.In output method all the values are getting printed and is acting as getter method.
- 4.Created studentmain class which is having main method and created object in this class.

#Expected and Actual output are same:

```
C:\Users\IBM_ADMIN\javaprg>javac studentmain.java
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true

C:\Users\IBM_ADMIN\javaprg>java studentmain
Picked up _JAVA_OPTIONS: -Djava.net.preferIPv4Stack=true
Enter the name
Alex
Enter the phone number
78774334
Enter the roll number
3
Enter the class
12
This is setter
Name:Alex
phone num:78774334
roll num:3
class:12
This is getter

C:\Users\IBM_ADMIN\javaprg>
```
